## ARCUS® SOURCE-TO-CONTRACT (S2C):

ARCUS® is the only single solution you need to efficiently manage information on your suppliers, including Environmental, Social and Governance (ESG) data.

When modules are utilised in a single, connected Source-to-Contract solution, users benefit from a comprehensive and holistic approach to sourcing. The solution increases visibility, enhances accessibility, operates using one single source of supplier data and allows you to track supplier progress over time.

**www.tradeinterchange.com**

## Advantages

- Reduced Administration via Integrations and Automated Notifications to Complete Tasks
- Users have Increased Confidence in Data Accuracy
- Allows for Effective Risk Management of Supplier Compliance
- Enhanced Visibility through Analytics
- Operates using a Single Source of Supplier Data

## Features

- Artificial Intelligence
- Integrations
- Task Intelligence and Auto-escalation
- Efficient and Accurate Data Exchange

# FEATURES:

## 1. Integration Technology

ARCUS® Connect, our native API, allows ARCUS® to connect with official data sources, establishing a live connection with the source and populating the fields in ARCUS® with the required information. This is automatically kept up-to-date.

## 2. Artificial Intelligence

Certifications are scanned at the point of upload and verified with 99.5% accuracy in our eRFX and SIM modules, flagging any discrepancies.

## 3. Efficient and Accurate Data Exchange

Data is transferred straight from ARCUS® eRFX to Supplier Information Management (SIM). This flow of data works both ways, transferring tender answers to the awarded SIM supplier record, and auto-populating existing SIM answers in any new sourcing events.

## 4. Task Intelligence

Task Intelligence functionality is now present in all ARCUS® workflows. This allows internal approval and other workflows to electronically match your business needs and best practices, meaning delegation of authority, and other business rules can be completely digitised.

# S2C SOLUTIONS:

**ARCUS® SSM** — Strategic Sourcing Management

Workflow-based sourcing, providing visibility to current and planned strategic sourcing activity, including savings.

**ARCUS® eRFX** — Supplier Tender

Digitise the tendering process using standardised templates, scoring and selection tools.

**ARCUS® eAUC** — Supplier Negotiation

Invite suppliers that have proved their credentials to compete in online auctions.

**ARCUS® SIM** — Supplier Information Management

Supplier on-boarding and compliance management, including ESG, via a web-based portal.

**ARCUS® SCM** — Supplier Contract Management

Centralised contract repository that provides visibility, process management, alerts and reporting.

**ARCUS® SPM** — Supplier Performance Management

Collect and report on critical supplier performance information based on KPIs and SLAs.

**ARCUS® ANALYTICS**

Visualise your organisation's sourcing strategy, contracts, supplier compliance including current and future ESG credentials over time.
